Dear Potential Participant,

The Coach to Communicate Project (C2C) will provide a webinar for parents, caregivers, teachers, and service providers of children with autism spectrum disorder (ASD), as well as face-to-face/online individual parent training sessions at no cost. Participants will be instructed in how to improve the communication skills of their own children.

This project is intended for parents/guardians who have a child up to age 22 with ASD or similar characteristics, needing instruction in communication skills. If you and your child decide to participate in this project, you will participate in a 1-hour webinar, with the opportunity to move into individual parent training sessions to learn to implement a communication intervention with your child. Your child will receive communication/behavioral assessments and a communication intervention which will be implemented by you. The recommended parent training sessions will consist of approximately 10, 1-hour sessions over the course of 12 to 16 weeks. Shorter coaching sessions are also available, if more suited to your needs.

If you are interested in participating in this project, visit autism.tamu.edu for enrollment information, or contact the project coordinator, Kim Williams at TAMUAuParent@tamu.edu.

Thank you for your interest and I look forward to meeting you.

Sincerely,

Sanikan Wattanawongwan, Ph.D.
Texas A&M University
